FRESHNESS & DATA STAMPS

Report generated	June 4, 2026
Platform refresh	Jun 3, 2026
Macro data as-of	2024
Trade data as-of	2024
Markets coverage	Not covered
Policy last reviewed	Jun 4, 2026

Values shown in this report are sourced and time-stamped. Platform refresh is not a markets feed. Fields without structured backing are labeled Not covered.

SOUVERA SIGNAL SCAN

Emerging · Reform momentum

Confidence: **High**

- FDI net inflows \$4.5B (2024)
- GDP growth 3.3% (2024)
- Inflation 18.8% (2024)

At-a-glance (12 months)

- **Base case:** Nigeria represents a major economy at a structural inflection point, offering multi-sector investment opportunities across technology, agriculture, infrastructure, and financial services.
- **Top risks:** Nigeria's investment landscape requires a balanced assessment of macro, political, and operational risks. Risks are real but manageable through strategic partnerships and phased capital deployment.
- **Watchpoints (90d):** Governance & Stability

Executive Summary

Nigeria represents a major economy at a structural inflection point, offering multi-sector investment opportunities across technology, agriculture, infrastructure, and financial services.

Nigeria's investment landscape requires a balanced assessment of macro, political, and operational risks. Risks are real but manageable through strategic partnerships and phased capital deployment.

This executive summary uses canonical macro stamps and the institutional policy registry; items without structured backing render as Not covered.

Base / Upside / Downside

BASE CASE	UPSIDE	DOWNSIDE
- Nigeria represents a major economy at a structural inflection point, offering multi-sector investment opportunities across technology, agriculture, infrastructure, and financial services. - GDP growth 3.3% (2024) - Signal: Emerging · Reform momentum	- FDI acceleration above \$4.5B - Sector leaders maintain attractiveness scores >80 - Policy frameworks align with USTR/AU/ECOWAS registry entries where listed	- Inflation re-acceleration above 18.8% - FX volatility beyond structured series - Political/security shocks (see Risk)

What changed since last structured year

- GDP growth moved -0.8 pp (2023→2024).
- Nominal GDP scale +89% (2023→2024) in USD terms (USD values reflect FX/base effects).

Key watchpoints (30–90d)

- Currency Volatility
- Governance & Stability
- Policy registry refresh (AGOA/AfCFTA/ECOWAS)

Geography & Demographics

Nigeria occupies a strategic position within Africa economic geography — a market profile designed for investors who may not yet know the country's location, scale, or demographic advantage.

Nigeria is part of Sub-Saharan Africa's frontier and emerging-market corridor, where AfCFTA continental integration is reshaping supply chains and manufacturing location decisions. The country connects West, East, or Central African trade routes depending on its coastal and land-border profile.

The administrative capital is Abuja, which hosts core policy institutions, while commercial hubs often concentrate financial services, logistics, and technology clusters. Understanding this urban hierarchy helps investors site operations, hire talent, and engage regulators.

With a population of 223.8M and economic output of \$477.4B, Nigeria offers scale sufficient for consumer markets, labor-intensive manufacturing, and services expansion — subject to infrastructure and market-access conditions detailed later in this profile.

Fact	Value	Note
Region	Africa	Sub-Saharan Africa — frontier and emerging market corridor with AfCFTA continental integration.
Capital	Abuja	Administrative and policy center
Currency	NGN	Official unit of account
ISO Codes	NGA / NG	International identifiers
Economic Scale	\$477B+	GDP (2024) — West Africa's largest economy, representing 24% of regional output
Population	223.8M	Population (latest) — Africa's most populous nation with median age of 19.7 years
Tech Hub	Lagos	Fintech Capital — 400+ funded startups, \$2B+ VC investment
Growth Leader	3.3%	GDP Growth (2024) — Post-reform macro trajectory per structured series

Political Environment

Political environment assessment for Nigeria — governance quality, institutional stability, and security conditions that affect investment timelines and capital repatriation.

Nigeria's political landscape spans governance, security, corruption. For international investors, political risk is not abstract: it determines contract enforcement, license continuity, tax policy stability, and the security of personnel and assets on the ground.

Governance & Stability (MODERATE): Nigeria's democracy is mature (25 years, 7 peaceful transitions), but challenges persist: 2027 presidential election watchpoint, security issues (Boko Haram, banditry), corruption rank 145/180. Souvera monitors election cycles, security hotspots, and governance indicators alongside macro data because political shocks often precede currency and FDI volatility.

Private sector resilience: Nigerian companies (Dangote, BUA) have operated through multiple volatility cycles

MODERATE

Governance & Stability

Nigeria's democracy is mature (25 years, 7 peaceful transitions), but challenges persist: 2027 presidential election watchpoint, security issues (Boko Haram, banditry), corruption rank 145/180.

- Strong institutions (CBN independence)
- IMF/World Bank oversight

Economic Overview (Macro & Monetary)

Economic overview for Nigeria — macro scale, growth trajectory, and price stability based on World Bank, IMF, CBN.

This section summarizes Nigeria's macroeconomic performance using official and multilateral data sources (World Bank, IMF, CBN). Indicators include GDP scale and growth, inflation, foreign direct investment, population, and exchange-rate dynamics — the core variables that drive sovereign risk pricing and corporate valuation multiples.

Reflecting ongoing macro adjustment post-2023 currency reform. Investors should read headline metrics alongside the multi-year trajectory in the indicator panel — single-year snapshots can mislead when reforms or currency moves create base effects.

Nigeria's GDP moved from \$598.6B (2019) to \$477.4B (2024), a 20% decrease over the series window. The 2023 currency reform initially compressed GDP in dollar terms; the 2024 level reflects technology sector momentum and oil production recovery per structured macro data.

Year	GDP USD	Growth	Inflation	FX
2019	\$598.6B	-6.4%	13.2%	—
2020	\$609.1B	1.1%	17.0%	—
2021	\$647.0B	4.3%	18.8%	—
2022	\$487.4B	3.3%	24.7%	—
2023	\$252.3B	4.1%	33.2%	—
2024	\$477.4B	3.3%	18.8%	1547.50

- GDP growth: -6.4% (2019) → 3.3% (2024)
- GDP scale: \$599B → \$477B over 6 years
- Inflation 18.8% (2024) — declining from 2023 peak

External & Trade

Trade and sector analysis for Nigeria — how the country connects to global and regional markets, and where export-oriented investment can capture preferential access.

Nigeria recorded approximately \$38.2B in goods exports and \$24.5B in imports in the latest Souvera trade registry refresh. Bilateral flows, AGOA restoration opportunity, regional integration. Bilateral concentration matters: top partners include China (34%), United States (13%), European Union (18%) shape currency earnings, supply-chain dependence, and geopolitical exposure.

Trade performance is only half the story. Preferential frameworks — AGOA, AfCFTA, ECOWAS, CBI, or CARICOM — determine whether manufactured and agricultural exports enter major markets at reduced or zero duty. Investors should align product mix and origin rules with active agreements.

Sector scorecards below rank Strength, Growth, and Attractiveness (S/G/A) for each vertical Souvera tracks. These scores synthesize terminal data, editorial intelligence, and comparative regional benchmarks — helping investors prioritize sectors before committing diligence resources.

Metric	Value
Exports	\$38.2B
Imports	\$24.5B
As-of year	2024

HS export/import composition: Not covered in this edition.

Regional frameworks

Agreement	Summary
AGOA	U.S. preferential market access · eligibility subject to annual Presidential review The African Growth and Opportunity Act allows qualifying exports to enter the United States duty-free when a country is certified eligible — subject to annual U.S. Presidential review.
AfCFTA	54 nations · 1.3B consumers · 90% tariff elimination by 2030 The African Continental Free Trade Area creates a single market of 54 countries, phasing out tariffs on 90% of goods and enabling regional manufacturing and distribution strategies.
ECOWAS	15 West African nations · 350M people · duty-free regional trade The Economic Community of West African States provides duty-free trade among 15 member nations and harmonized investment protocols for West African operations.

Sectors & Scorecards

The Souvera sector scorecard ranks verticals on **Strength** (current competitive position), **Growth** (expansion trajectory), and **Attractiveness** (investment appeal). Scores run 0–100. Higher scores indicate stronger positioning relative to regional peers. Use this section to shortlist sectors before deep due diligence.

Nigeria recorded approximately \$38.2B in goods exports and \$24.5B in imports in the latest Souvera trade registry refresh. Bilateral flows, AGOA restoration opportunity, regional integration. Bilateral concentration matters: top partners include China (34%), United States (13%), European Union (18%) shape currency earnings, supply-chain dependence, and geopolitical exposure.

Trade performance is only half the story. Preferential frameworks — AGOA, AfCFTA, ECOWAS, CBI, or CARICOM — determine whether manufactured and agricultural exports enter major markets at reduced or zero duty. Investors should align product mix and origin rules with active agreements.

Sector	S	G	A	Teaser
Technology & Software	82	88	91	Nigeria leads Africa in tech innovation with startups, VC investment, and global
Agriculture & Food Processing	74	68	79	Nigeria is Africa's largest agricultural producer, cultivating 70M+ hectares wit
Energy & Power	76	72	85	Nigeria holds Africa's largest natural gas reserves (), 37B barrels of proven oi
Manufacturing & Textiles	68	64	73	Nigeria's manufacturing sector produces in annual output across cement, steel, t
Mining & Natural Resources	58	76	88	Nigeria holds untapped reserves of lithium, tin, coal, gold, and rare earth elem

Methodology: See Appendix — Scorecard Methodology. Confidence: high.

Investment Opportunity

Investment opportunity assessment for Nigeria — multi-sector opportunities at structural inflection point.

Nigeria offers multiple entry channels across technology, agriculture, infrastructure, energy, and services. The pillars below summarize where patient capital has the highest structural tailwinds — based on Souvera terminal intelligence, not generic emerging-market templates.

Each opportunity area includes specific sub-themes (fintech, value-add agriculture, power, logistics) with quantified market gaps where available. Investors should cross-reference Risk Assessment and Market Access sections before sizing commitments.

Technology Sector — Africa's Leading Tech Hub

Nigeria's technology ecosystem has reached critical mass, with Lagos emerging as Africa's leading tech hub. Fintech transaction volumes are large and growing; verify latest figures against sector sources before sizing exposure.

Agricultural Value-Add — Import Substitution Play

Nigeria is Africa's largest agricultural producer but imports \$10 billion in processed food annually. Massive opportunity in value-added processing and export-oriented agriculture.

Infrastructure Development — Multi-year infrastructure pipeline

A multi-year infrastructure pipeline spans power, transport, and housing — driven by urbanization. Treat headline pipeline totals as estimates until tied to structured project data.

Risk Assessment

Risk assessment for Nigeria — balanced assessment with structural reforms and mitigation frameworks.

Institutional investors require explicit risk taxonomy: macro (currency, inflation, debt), political (governance, security), operational (power, logistics, talent), and sector-specific exposures. Nigeria's profile below follows this structure with severity ratings and mitigants for each factor.

No emerging market is risk-free. The objective is risk-adjusted return — identifying where mitigation tools (insurance, local partners, phased deployment, hard-currency revenue) bring exposures within acceptable bounds for your mandate.

MACRO RISKS

MODERATE Currency Volatility

Naira depreciated post-2023 unification; FX at 1547.50 (2024) per structured series. Volatility has moderated under managed float policy. CBN reserve position should be verified against latest official releases.

MODERATE-HIGH Inflation

Inflation at 18.8% (2024) remains elevated but declining from the 2023 peak. CBN policy rates should be verified against latest official releases.

LOW-MODERATE Debt Sustainability

Debt sustainability metrics should be verified against IMF/World Bank sovereign updates; treat debt-to-GDP ratios as estimates until tied to structured fiscal series.

POLITICAL RISKS

MODERATE Governance & Stability

Nigeria's democracy is mature (25 years, 7 peaceful transitions), but challenges persist: 2027 presidential election watchpoint, security issues (Boko Haram, banditry), corruption rank 145/180.

OPERATIONAL RISKS

HIGH IMPACT Power Supply

Grid instability requires self-generation (diesel/solar), adding 15-25% to operating costs. Lagos/Abuja grids more reliable than national grid.

MODERATE Logistics

Port congestion averages 10-14 days clearance. Road quality variable; Lagos-Abuja corridor is well-maintained.

MODERATE Talent Retention

Brain drain to Europe/U.S./Canada impacts skilled workforce availability, particularly in tech and professional services.

Mitigation toolkit: PRI/MIGA coverage, FX hedging, phased deployment, local JV structures — align to mandate.

Signal Scan & Souvera Edge

Souvera Signal Scan synthesizes macro momentum, FDI, inflation, and sector leadership into an actionable badge.

Timing and entry strategy are summarized in the Opportunity and Risk sections; verify macro and policy stamps before deployment decisions.

Differentiators vs static country briefs: live data refresh, trade policy legislative tracking, sector S/G/A scorecards, and quota-managed AI custom briefs grounded in this same intelligence foundation.

Emerging · Reform momentum

Confidence: **High** — derived from structured macro coverage (2024).

- FDI net inflows \$4.5B (2024)
- GDP growth 3.3% (2024)
- Inflation 18.8% (2024)

Model limits

Signal scan synthesizes available macro and sector inputs; it is not a trading signal. Where series are incomplete, confidence is downgraded and drivers use canonical metrics only.

Souvera edge

- Live Signal Scan — updated with macro and sector inputs, not annual PDF refresh cycles
- Market Access Registry — AGOA restoration/suspension, AfCFTA, ECOWAS, CBI, CARICOM in one view
- Trade Policy Intelligence — legislative tracker and export opportunity mapping
- Terminal-to-PDF parity — this report mirrors the seven country intelligence tabs
- AI Custom Briefs — query-driven reports grounded in Souvera data (Business+ quota)

Appendix: Methodology

Scorecards rank Strength (position), Growth (trajectory), and Attractiveness (investment appeal) on 0–100 scales versus regional peers.

Signal scan combines macro momentum, FDI, inflation, and sector leadership with explicit confidence tiers.

Data quality: fields without structured backing render as Not covered; preflight blocks contradictory narratives and unresolved template tokens.

Data & Methodology — providers

- **World Bank** — Macro indicators (GDP, growth, inflation, FDI, population) via WDI.
- **IMF** — Fiscal and external-sector series where ingested (SDMX / AREAER).
- **UN Comtrade** — Bilateral goods trade flows and partner concentration.
- **USTR** — AGOA and U.S. preferential program eligibility.
- **AU** — AfCFTA continental trade framework status.
- **ECOWAS** — West African regional integration and market-access protocols.

Appendix: Glossary

This glossary defines key institutions, economic indicators, and trade programs referenced in this Country Profile.

IMF (International Monetary Fund)	A global institution that monitors economic stability, provides policy advice, and lends to countries facing balance-of-payments crises. IMF forecasts and program reviews are widely cited in sovereign and corporate credit analysis.
World Bank	Multilateral development bank focused on poverty reduction and infrastructure. Its Doing Business successor indicators, country economic updates, and project pipelines inform sector entry timing.
GDP (Gross Domestic Product)	The total value of goods and services produced within a country in a given period. GDP scale indicates market size; GDP growth signals expansion or contraction of economic activity.
FDI (Foreign Direct Investment)	Cross-border investment where a foreign entity establishes lasting interest in a local enterprise (greenfield, joint venture, or acquisition). FDI inflows signal international confidence in a market.
CPI / Inflation	Consumer Price Index measures average price changes for household goods and services. Elevated inflation erodes purchasing power and can pressure interest rates and currency stability.
FX / Exchange Rate	The price of one currency in terms of another (e.g., local currency per U.S. dollar). Exchange-rate movements affect import costs, export competitiveness, and the dollar value of local earnings.
AGOA (African Growth and Opportunity Act)	U.S. trade preference program granting eligible African countries duty-free access for thousands of product lines. Eligibility is subject to annual U.S. Presidential review and can be restored or suspended.
AfCFTA (African Continental Free Trade Area)	Pan-African agreement creating a single market of 54 countries and 1.3 billion consumers, with phased tariff elimination. Enables regional manufacturing hubs and cross-border supply chains.
ECOWAS (Economic Community of West African States)	Regional bloc of 15 West African nations promoting free movement of goods, services, and people. Membership provides duty-free regional trade and harmonized investment protocols.
CBI (Caribbean Basin Initiative)	U.S. preferential trade program for Caribbean Basin countries, allowing duty-free entry for many goods exported to the United States when eligibility criteria are met.
CARICOM (Caribbean Community)	Political and economic union of Caribbean states. The CSME (Caribbean Single Market and Economy) component supports regional labor mobility and services trade.
MIGA (Multilateral Investment Guarantee Agency)	World Bank Group agency providing political risk insurance against expropriation, currency inconvertibility, and breach of contract — commonly used to de-risk greenfield FDI.
